**You've Taken the First Step
Toward Your Company's AI
Transformation.**

Here is everything you need to know about what OneGPT can do for your team and what happens next.

THE REALITY TODAY

AI Is Already Inside Your Organization Just Not Under Your Control.

\$37B

Enterprise AI spend in 2025

(3.2x YoY growth)

80%

Of companies show Shadow AI activity

269

Shadow AI tools per 1,000 employees

on average

51%

Of employees use AI tools without IT approval

Your team is already using AI. The question is no longer whether to adopt it — it's whether you control it, or it controls you.

Fragmented AI Doesn't Just Cost Money. It Costs You Control, Security, and Strategy.

Cost Overrun

Multiple overlapping subscriptions (ChatGPT, Claude, Gemini, Grok) with no consolidated billing.

Average enterprise wastes **40–60% of AI spend** on redundant tools.

Data Risk

Sensitive company data flows into external AI models with no governance, no audit trail, and no GDPR safeguard. **One prompt** can expose your competitive advantage.

Lost Productivity

No shared memory, no company knowledge base, no AI agents. Every employee starts from zero. **Every conversation is lost.** Every insight disappears.

THE SOLUTION

One Workspace. Every AI Model. Full Enterprise Control.

OneGPT is the unified AI platform built for companies that want to move fast — without losing control.

14+ AI Models

Your Company's Intelligence Is Your Competitive Advantage. Keep It That Way.

OneGPT keeps all memory, context, and knowledge entirely within your organization. Connect your company files, internal documents, and knowledge bases — and let every team member benefit from shared institutional intelligence without ever exposing it to the outside world.

- ✓ All AI conversations stored and governed internally
- ✓ Connect company files, documents, and knowledge bases
- ✓ Usage policies, access controls, and full query logging built in

"External AI tools = your data leaving your organization. OneGPT= your data stays yours."

Built for Enterprises That Cannot Afford to Compromise on Data.

GDPR Compliant

Standard Contractual Clauses (SCCs) in place. Only the minimum necessary data is sent to AI models never your full company dataset.

Enterprise Access Management

Role-based access control, SSO-ready, team-level permissions, and centralized user management. Full visibility into who uses what, when.

Full Data Sovereignty

You decide where your data lives. Full audit logs, query history, and governance dashboards give your IT and legal teams complete oversight.
